

"We believe the best way to have an impact on the environment is to have as little as possible."

We treat heavy haul roads.

Why we do what we do?

Desert Mountain is very passionate about the products and services we provide. We understand that safer roads save lives. We strive to use and create products that can make that happen. Our products, when applied correctly, will make your roads safer. Through information sharing i.e. brochures, web links and on site training. We will teach and share our knowledge with customers to help educate and inform. With a focus on the environment, we recognize water is a precious commodity. Why waste it? Our products can help reduce needless water usage. We're passionate about developing the most efficient, economical and environmentally friendly solutions to help you.

That's why we do what we do.

Save water by using our products.

Testimonials

Since we started using Ice Slicer exclusively in 1999 we have had up to a 75% reduction in material use and approximately a 50% savings in snow fighting costs per storm. Mel Farley, City of Casper Streets Supervisor, Casper, Wyoming

To whom it may concern: "We have worked with Desert Mountain Corporation on numerous projects. We have been extremely satisfied with the experience that we have had working with Desert Mountain. Sincerely, Don Bennett.

The benefits from Ice Slicer are much more than we expected. We determined that 75% less material was used in the test area than other areas of the City. City of Green River, WY.

IceSlicer---"It's the greatest thing since buttered popcorn!"
Bill Obermeier, Director of Streets and Alleys, Cheyenne, WY

To start out with, we have used just about everything on the market from real light to salt brine to shale, rock salt, but when it comes down to it, Ice Slicer has work the best for us. It is a lot cleaner very little clean up and it seems to cut the ice better than anything we have tried. Thank you, Bill, City of Sheridan, Wyo.

"The Durablend product in my opinion has probably held up 50% better than straight Mag." Jim Hedges, Fremont County Transportation

To whom it may concern: We are very pleased with the professionalism of the Desert Mountain Corporation.
Fred Goodrich, Roads and Reclamation Superintendent

We have used Desert Mountain Corp. to service our almost 5 miles of gravel roads in an upscale community in Tesuque, NM, for many years. We are exceptionally pleased with the excellent results, wash boarding and dust are a thing of the past and our roads have maintained in very good condition in monsoon or drought. Our grading costs have also been significantly reduced. Desert Mountain continues to provide outstanding service to our community. Sincerely, Dennis Clements

It has been a pleasure working with Desert Mountain starting with the sales representative who has offered good advice on which products were available and what was required for application. The operations people were easy to work with, very accommodating and came through with all commitments made. It has made my job as the head of our Metro District much easier.
Gary Lansdale

Product Information

Dust Control and Road Stabilization

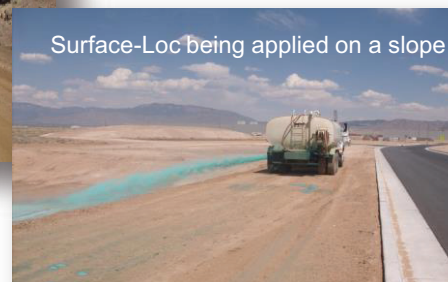

Desert Mountain provides a full line of environmentally friendly dust control and road and soil stabilization products. We have our own fleet of late model transport and application equipment. Our spray trucks are computerized to give you precise application rates. We utilize railroad railcar support to help mobilize products into a given area for quicker access. No matter how big or small your job is, we're here to help. Call today and let one of our trained professionals help you decide which product will achieve the results you desire.

Our most widely used product, **RoadSaver**, is a magnesium chloride product that performs well in most soil types.

- **Durablend** is a reduced chloride product custom blended product for use in environmentally sensitive areas.
- One of our best binders, **Road-Loc**, is a all natural organic polymer that works best for road stabilization.
- **Surface-Loc** is a product designed for soil stabilization, dust control and helps reduces soil surface erosion. **Surface-Loc** is a co-polymer product for use on stockpiles, paths, hillsides, parking lots and earthen runways, anywhere soil stabilization is needed.
- **Specialty Products:** We also offer a full line of blended products that we can customize for your particular soil and climate type. By blending products together we can achieve superior results in the areas of road stabilization and dust control.

We are constantly striving to improve ourselves by adding more value to existing products, testing and bringing on new products. **Call today and we can help.**

High Performance Ice Melts

We have a complete line of granular and liquid products to choose from.

Liquid products:

- **Meltdown** is our most popular liquid product and is effective down to 15 degrees and can be used as a anti-icer or a de-icer.
 - **Meltdown liquid** can also be purchased with a corrosion inhibitor added for use on and around bridge deck areas.
- **Apex** is our new premium enhanced liquid product. Apex is designed to work at lower temperatures (-8) and can also be applied in lower application rates. Therefore, making it more cost effective and saving you money.

Our granular product:

- **Ice Slicer** is our most popular granular product, it is an environmentally friendly, low-corrosion de-icing product used to break the bond of snow and ice from roadways, walkways, driveways, and parking lots. Regular road salt stops working when the temperature dips below 20° F, that's just when the roadways can be most dangerous. IceSlicer's unique blend of natural chlorides melts snow and ice effectively down to 0° F, resulting in safer roads at lower temperatures with less sand and cinder clean up after the storm. IceSlicer can also be purchased in both bagged and bulk quantities. IceSlicer is a DOT favorite and is preferred by many western US cities and states. We also provide a complete line of consumer grade bagged products. These products come shipped 50 to a pallet, packaged in 50lb bags.

Desert Mountain has multiple storage areas located throughout the Western U.S. to better serve you during those winter storm events. When the storm is on its way or you just want to be ready, we have a winter product that's right for you. Call today and we'll help you select the best product for your application.
